Health Director Is Pahokee Speaker

Dr. C. L. Brumback, Palm Beach County health director, was guest speaker at the November meeting of the Pahokee Parent-Teacher Association in the high school auditorium Monday night. Introduced by James W. Vann, program chairman, Dr. Brumback spoke on the County health program as it affects the school child. The value of the County's newly established Mental Health Clinic was stressed in his talk. Approximately 75 school children have already been examined for need of treatment in the new clinic, he said.

At the business session, with Mrs. John Dulany, president, presiding, Mrs. J. M. Elliott read the report on the recent PTA Halloween carnival submitted by Dr. E. J. Graham, carnival chairman, who listed receipts at the carnival as totaling \$1,143.82, of which \$584.78 goes to PTA, with only one bill, that for electrical wiring, still outstanding.

Mrs. E. L. Pope, membership chairman, reported a paid-up membership of 665 to date, only 8 short of the 673 members necessary for the PTA Blue Ribbon, status, which the organization has set for Dec. 1 to attain. Additional schools reporting 100 per cent membership of parents in PTA include Mrs. Peggy Willis's third grade and Roy Evans' fourth grade for October; Mrs. Charlotte Walston's fifth grade, Mrs. Tommie Lee DuBose's sixth grade and Mrs. Martin Bridge's first grade for November. They deserve a great deal of thanks and I wish to publicly thank them," Mr. Morris said.

Election Cost Is \$7500 In County

Cost of the county's part in the November 2 general election was estimated this week by the county commission at about \$7,500.

Of the cost, some \$5,800 was set aside to pay election officials who manned the county's polling places. The rest of the amount was expended to move voting machines and to set up election machinery.

The commission Monday approved a canvassing board report and certified results of the election to R. A. Gray, Florida's Secretary of State.

Precinct workers drew praise from the commission for their part in the election. The election was described as "one of the smoothest" in many years.

Bids on county's rolling stock were received by the commission this week—prices ranging from \$8,992 to \$5,900. The bids were referred to the county engineer and county attorney for tabulation and recommendation.

The commission also received bids on four lots of lumber and a lone bid on a special car to be used by the county investigator. The lumber bids were referred to the county engineer, and the car bid of Bev Smith Ford Company was accepted by the board.

The commission approved purchase of 1½ acres of land near Lake Park for canal right of way and authorized the county engineer to seek State Road Department repairs for Lake Worth Road near Keller's Canal.

A lease for radio equipment at Lantana Airport owned by Florida Airmotive Inc., was approved by the county at the rate of \$1 a year.

The commission approved a recommendation by County Auditor R. B. McKee for a physical inventory of county property and hired Fred Borg, West Palm Beach, to take the inventory. The count of county property is expected to take from six to eight weeks and will be the first inventory made in several years.

Blue Devils Rest After Vero Game

The Pahokee Blue Devils are getting a well-earned rest in an open date this week after traveling to Vero Beach last Friday night, and neatly clearing one of the highest hurdles in the Suncoast Conference race by whipping the Indians, 26-7, and extending their current winning streak to seven games.

The Blue Devils' powerful Halfback Hal Rosenberg started the Pahokee scoring early in the first period with a 43-yard run and later took the kick-off on his own five and ran 95 yards for a TD. The Blue Devils' other two TD's were chalked up by End Chat Clark who caught one of Quarterback Mills' passes for the first, then took advantage of an Indian fumble for his second touchdown.

Pahokee meets St. Ann's at West Palm Beach in a non-conference game on Nov. 19 before tangling with the Rams in the traditional Thanksgiving Eve classic on Lair Field the night of Nov. 24, which ends the season.

This new policy, recommended by Waterworks Commissioner Robert B. Simonson, is to become effective Jan. 1, 1955. The Council commended Waterworks Superintendent Robert J. Schroder and his staff for the efficient operation of their department during the past year in which a paper profit of over \$18,000 was reported.

Some amendments to the new loading zone ordinance were recommended at the meeting by the growers and contractors' advisory committee, with Earl Crossman acting as spokesman. These amendments to the new loading zone ordinance were recommended at the meeting by the growers and contractor's advisory committee, with Earl Crossman acting as spokesman. These amendments, accepted by the Council, included the daily rental of a loading stall to a bonafide farmer in search of labor to harvest his own crop only at the rate of \$5 per day, the number of stalls to be rented to an individual farmer at the daily rate not to exceed two. Another of the amendments allowed a grower or contractor to rent a stall on a yearly basis at \$100 or for a half year at \$50. Police Chief Guthrie reported 40 stalls have been marked off in the new loading zone and 22 have been rented on an annual basis, to date.

Here Is What Transpired At Monday's Meeting Of The Palm Beach County Commission

Opening of a new bridge at Six Mile Bend by mid-December was promised Monday by Cleary Brothers, contractors on the project which has been delayed because of inclement weather.

Completion of Six Mile bridge was one of several items of interest in the Everglades which was brought before the County Commission this week by Paul Rardin,

Canal Point, a member of the county board.

At Rardin's insistence, the regular meeting of the commission was delayed long enough for County Engineer Steven Middleton to contact the bridge contractor to find out what was delaying the project. The contractors reported that the condition of roadbed fill which had been taken from the Hillsboro

Canal had caused the delay. Condition of the fill had caused a number of soft spots in the roadbed which are now being worked out.

Construction of a county health center at Pahokee, the commission learned, was being delayed by failure of Pahokee officials to complete a land deed to the county, according to County Attorney Harry Johnston.

The commission also learned that failure to supply the county with description of lands in Port Mayaca Cemetery, was holding up designation of a section of the cemetery to be used for pauper burials.

Commissioner Rardin won support of the commission for an early start on resurfacing a one mile stretch of Larrimore Road.

Payment for construction of a section of Bolles Canal Road by November 15 was authorized by the commission and Rardin was authorized to make arrangements for a number of minor road repairs in the Glades.

orized to make arrangements for a number of minor road repairs in the Glades.

Give a farmer some spare time and look what he does with it

By IRA MILLER

Farm Electrification Bureau
Give an industrious farmer some spare time and a free hand with his transformer type electric arc welder and he's liable to come up with all manner of home-made devices. Examples of what one young southern farmer "cobbled" up during an off season are shown below.

Black saw—1/8 horsepower motor; 3 plywood pulleys, 4 roller bearings, 3/4" pipe, angle and flat iron—from discarded farm equipment. Grinder—1/3 horsepower motor; automobile windshield; section of metal fence post; scrap metal. Table—pipe and scrap metal. Seat, used with grinder but not shown, can be adjusted to various heights. Parts came mainly

Junked automobiles and pipe left over after the installation of a home hot water heating system provided most of the material for these workable and useful farm tools. In general, here are some of the "scraps" and power units used:

Drill press—stand and frame of 3/4" pipe, connecting rod from old car and wooden pulleys. (Pulleys were made on a home-made bandsaw, also constructed of scrap metal parts welded electrically.) Auxiliary farm tractor—junked auto chassis with motor, transmission and differential; steering mechanism, axles and wheels from two other wrecked cars and one transfer truck; plus 800 pounds of concrete dumped under seat on reinforced floorboards to heavy up tractor.

from an old riding cultivator. The base is a discarded brake drum. Pipes, of different circumferences, fit one inside the other to form the standard. Holes are drilled through both so that a metal peg can be inserted to raise or lower the seat to height desired.

In addition to enabling farmers to make new equipment, electric welders are invaluable tools to have at hand when machinery breakdowns occur and emergency repairs are necessary.

Court House Open On Veterans Day

The county court house remained open November 11 which has been designated a holiday in some instances in observance of Veterans Day.

The county commission this week pointed out that some time ago, a five day week was adopted for most county employees and at the same time, a number of legal holidays were established.

Memorial Day was set aside as a legal holiday to honor veterans of all wars—an observance which previously had been partially observed on November 11—Armistice Day. President Eisenhower recently set November 11 as Veterans Day.

The commission suggested that veterans organizations planning future observance on November 11, notify the commission far enough in advance so consideration could be given to making the observance an official holiday.

Fire Is Fatal To Emma McFadden, 55

A Negro woman, Emma McFadden, 55, was burned to death in an early morning fire in the Negro section of Pahokee Tuesday, according to Police Chief Leon Guthrie.

The fire, believed by Fire Chief Marvin Levins to have started from an overheated kerosene stove, was discovered in one of W. A. Keen's small rental buildings around 3:30 a. m. and by the time the city's fire department reached the scene it was out of control.

Four teenage boys, two of her sons and two of her sister's sons, were sleeping in the buildings in separate rooms from that in which the woman was sleeping. They awoke in time to escape but were unable to enter the woman's room to save her as it was completely enveloped by flames when the fire was discovered. Chief Guthrie said.

She was a native of Mullins, S. C., was employed as a migrant farm worker during the farming season here.

Cinematic Chatter

By Malcolm Miller

Hello everybody! Diana Lynn has 88 keys to open the doors of fame. 88 keys of the piano. Born in Los Angeles, Diana's parents started her musical education early in her life before her legs were long enough to reach the deals of grand piano. The talent that was inborn in Diana was nurtured through lessons and continual practice and the only career that interested the young lady was one that would keep her behind the keyboard. An accident of fate changed Diana's course in life, when she acted as accompanist for a violin friend at a Hollywood audition for talented young musicians. It was the pretty youngster at the piano that caught the attention of the viewing studio executives. Hollywood saw in Diana Lynn a vivacious young lady with a great star potential, though now she rarely gets the opportunity to play the piano on the screen. The reputation she had barley started to establish in music circles stood her in good stead when she returned to her film, and concert work. Diana has recorded two piano phonograph albums of popular as well as classical pieces. Diana range of roles is great. She has played brattish kid sister parts and now, grown to womanhood she is riding high on that star of success. See you at the movies—Mal.

Christian Science Group Of Canal Point

The spiritual basis for healthful, happy, abundant living will be dealt with at Christian Science services Sunday.

Keynoting the Lesson-Sermon entitled "Mortals and Immortals" is the Golden Text from John (3:6): "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit."

Selections to be read from "Science and Health with Key to the Scriptures," by Mary Baker Eddy include the following (76:22-26): "The sinless joy,—the perfect harmony and immortality of Life, possessing unlimited divine beauty and goodness without a single bodily pleasure or pain,—constitutes the only veritable, indestructible man, whose being is spiritual."

From the Bible the following passage will be among those read (Romans 8:6): "For to be carnally minded is death; but to be spiritually minded is life and peace."

THE *Right* MIX FOR EVERY JOB

WHICH ONE DO YOU WANT?

you can have your dream house—this easy way:

A dream? Not at all. Thousands of people with modest incomes have been able to save the down payment, or the whole price, of the home of their dreams—because they invested in U. S. Savings Bonds on the Payroll Savings Plan. Look at the chart on this page. See how you can accumulate enough money for the down payment on a home. Or enough for your children's college education or a retirement income. And by saving only a few dollars a week, too.

The answer is that you save *systematically* on the Payroll Savings Plan. All you have to do is tell your pay office how much you've decided to save each payday (it can be as little as a couple of dollars). After that your money is saved for you, *before* you get your salary. Then each time enough has accumulated, it is invested in a Bond, and the Bond turned over to you.

And remember—your U. S. Savings Bonds now will bring you an average of 3% interest, compounded semiannually, for 19 years and 8 months. That's why the money you put into Bonds now grows to such a surprisingly big sum.

Why don't you start—today? Sign, where you work, for the Payroll Savings Plan. Or, if you're self-employed, have your banker enroll you in the Bond-A-Month Plan. It's as easy as the Payroll Savings Plan.

How you can reach your savings goal on the systematic Payroll Savings Plan

| | If you want approximately | | |
|---|---------------------------|----------|----------|
| | \$5,000 | \$10,000 | \$25,000 |
| Each week for 9 years and 8 months, save.. | \$8.80 | \$18.75 | \$45.00 |
| Each week for 19 years and 8 months, save.. | \$3.75 | \$7.50 | \$18.75 |

This chart shows only a few typical examples of savings goals and how to reach them through Payroll Savings. You can save any sum you wish, from a couple of dollars a payday up to as much as you want. The important thing is, start your Plan today!
